Diane M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR
OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 3002985
Applicant Name: Dan Duffus
Address of Proposal: 6050 Fauntleroy Way SW

SUMMARY OF PROPOSED ACTION

Land Use Permit to establish use for a three-unit townhouse in an environmentally critical area. Parking for seven vehicles to be located at grade. Existing structures to be removed under separate permit.

The following approval is required:

SEPA - Environmental Determination
(Chapter 25.05, Seattle Municipal Code (SMC))

SEPA DETERMINATION ☐ Exempt ☒ DNS ☐ MDNS ☐ EIS

☐ DNS with conditions

☐ DNS involving non-exempt grading or demolition or
involving another agency with jurisdiction.

BACKGROUND DATA

Site and Vicinity Description

The subject site is located at the northeast corner of Fauntleroy Way SW and SW Graham Street in the Morgan Junction Residential Urban Village in West Seattle. The 11,042 square foot site is zoned Lowrise 2 (L-2) and developed with a four-unit townhouse building and two carports.

Surrounding property with frontage along Fauntleroy, to the north and south, is zoned L-2. Surrounding property to the east, across an alley, is zoned Single Family 5000. Surrounding property to the west, across Fauntleroy, is zoned Lowrise-Duplex-Triplex. The multifamily zoned sites (LDT and L-2) are generally underdeveloped with some apartments but mostly single family homes.

An approximately eight foot high rockery wall exists near the middle of the site separating the site into two terraces. The existing townhouse structure is located on the west terrace and the carports upslope on the east terrace. A second approximately eight foot high rockery wall exists along the eastern edge of the site adjacent to an alley. The rockery walls constitute a steep slope pursuant to the Environmentally Critical Areas (ECA) ordinance. A limited ECA exemption (Project #2205304) for the steep slopes was granted on August 3, 2002 which indicates the steep slopes at the site are not more than 20 feet in height and not part of a larger steep slope system.

Proposal

The proposal is to construct a three-story, three unit townhouse structure on the eastern half of the site. The existing four-unit townhouse structure will remain. Access to the site and to parking spaces for all the units will be via an existing curbcut from SW Graham Street. Surface parking will be provided for 7 vehicles. A unit lot subdivision is proposed to subdivide one parcel into seven unit lots under Project #3003243.

Public Comment

No public comments were received during the public comment period which ended on September 7, 2005.

ANALYSIS - SEPA

The proposal site is located in a steep slope and potential slide critical area, thus the application is not exempt from SEPA review. However, SMC 25.05.908 provides that the scope of environmental review of projects within critical areas shall be limited to: 1) documenting whether the proposal is consistent with the City's Environmentally Critical Areas (ECA) regulations in SMC 25.09; and 2) evaluating potentially significant impacts on the critical area resources not adequately addressed in the ECA regulations. This review includes identifying additional mitigation measures needed to protect the ECA in order to achieve consistency with SEPA and other applicable environmental laws.

Environmental review resulting in a Threshold Determination is required pursuant to the Seattle State Environmental Policy Act (SEPA), WAC 197-11, and the Seattle SEPA Ordinance (Seattle Municipal Code Chapter 25.05).

The initial disclosure of the potential impacts from this project was made in the environmental checklist submitted by the applicant dated July 19, 2005 and annotated by the Department. The information in the checklist and the experience of the lead agency with review of similar projects form the basis for this analysis and decision.

The SEPA Overview Policy (SMC 23.05.665) discusses the relationship between the City's code/policies and environmental review. The Overview Policy states, in part, "Where City regulations have been adopted to address an environmental impact; it shall be presumed that such regulations are adequate to achieve sufficient mitigation subject to some limitation". The Overview Policy in SMC 23.05.665 D1-7, states that in limited circumstances it may be appropriate to deny or mitigate a project based on adverse environmental impacts.

The policies for specific elements of the environment (SMC 25.05.675) describe the relationship with the Overview Policy and indicate when the Overview Policy is applicable. Not all elements of the environment are subject to the Overview Policy (e.g., Traffic and Transportation, Plants and Animals and Shadows on Open Spaces).

Short-term Impacts

Construction of the proposed townhouse structure may have short-term impacts on the environment; however, temporary soil erosion impacts on the identified critical areas (steep slope/landslide prone) will be limited and relatively minor.

Several adopted codes and/or ordinances provide mitigation for temporary soil erosion. The Stormwater, Grading and Drainage Control Code regulates site excavation for foundation purposes and requires that soil erosion control techniques be initiated for the duration of construction. The ECA ordinance and DR 3-93 and 3-94 regulate development and construction techniques in designated ECA's with identified geologic hazards. The Building Code provides for construction measures and life safety issues. Compliance with these applicable codes and ordinances will reduce or eliminate most short-term impacts to the environment. Due to the fact that grading will be undertaken during construction, additional analysis of earth and soils impacts are warranted.

Earth/Soils

The ECA Ordinance and Directors Rule (DR) 3-93 require submission of a soil report to evaluate the site conditions and provide recommendations for safe construction in areas with landslide potential and/or a history of unstable soil conditions. The applicant submitted a soils report dated July 15, 2005 prepared by Tubbs Geosciences and the reports were reviewed by the DPD Land Use Planner and DPD Geotechnical staff. The construction plans, including shoring of excavations as needed and erosion control techniques are being reviewed by DPD to ensure compliance with the ECA regulations. Any additional information required showing conformance with applicable ordinances and codes (ECA ordinance, The Stormwater, Grading and Drainage Control Code, DR 3-93, and 3-94) will be required prior to issuance of the building permit. Applicable codes and ordinance provide extensive conditioning authority and prescriptive construction methodology to assure safe construction techniques are used; therefore, no additional conditioning is warranted pursuant to SEPA policies.

Long-term Impacts

Long-term or use-related impacts are also anticipated as a result of approval of this proposal including: increased surface water runoff due to greater site coverage by impervious surfaces and loss of plant and animal habitat.

Several adopted City codes and/or ordinances provide mitigation for some of the identified impacts. Specifically these are: the ECA Ordinance, the Stormwater, Grading and Drainage Control Code which requires provisions for controlled tightline release to an approved outlet and may require additional design elements to prevent isolated flooding. Compliance with these applicable codes and ordinances is adequate to achieve sufficient mitigation of long term impacts on the identified environmentally critical area.

The proposal is consistent with the City's Environmentally Critical Areas (ECA) regulations and no further conditioning is necessary.

DECISION - SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirements of the State Environmental Policy Act (RCW 43.21C), including the requirement to inform the public agency decisions pursuant to SEPA.

- [X] Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21C.030 2C.
- [] Determination of Significance. This proposal has or may have a significant adverse impact upon the environment. An EIS is required under RCW 43.21C.030 2C.
